

Aligner Accessories

A useful guide to the accessories required to ensure all your aligner treatments are successful

TOC Impression Trays

These best selling trays provide superior alginate retention with no distortion of impressions.

- Full depth tray ideal for orthodontics
- Unique finger pressure platform assists balanced placement
- Slots with inner support tags retain alginate securely
- Excellent rigidity for improved accuracy of impression
- Long, non-slip handle for a firm grip
- Smooth rounded edges for added patient comfort
- No tray adhesive required
- Full range of sizes to ensure the right fit

Provides great accuracy needed for Aligner systems

Fast setting PVS Impression Material Perfect Impression Material for Clear Aligners

Easy to Mix & Use

Hand Mix and Place in Impression Tray

EXAFAST Putty

EXAFAST Putty is a vinyl polysiloxane material, consisting of a base and a catalyst that are easy to manipulate for accurate, void-free impressions. EXAFAST Putty produces crisp, extraordinarily smooth and precise impressions and can be used with either regular or injection wash material.

- The highest compression tray material used with double phase impressions
- Extremely smooth and easy to hand mix, avoid contact with latex, oils and moisture when mixing
- 45 second working time, sets after only 2¼ minutes in the mouth

Product Code TOC137307
Includes 1x jar putty base (287ml), 1x jar putty catalyst (287ml), scoops and instructions
List Price £74.70 pk

EXAFAST NDS Regular Wash

- Slightly thicker wash material used with double phase impressions
- Syringeable wash, a little more thixotropic and less runny than injection material
- Stays in place until pressure is applied to capture critical detail

Product Code TOC137007
Includes 2x 48ml cartridges (96ml total)
6 mixing tips and instructions
List Price £29.50 pk

EXAFAST NDS Injection Wash

- Syringeable wash material for double phase impressions
- Thinner wash that is a less thixotropic and more flowable
- Stays in place as pressure is applied to capture critical detail

Product Code TOC137107
Includes 2x 48ml cartridges (96ml total)
6 mixing tips and instructions
List Price £29.50 pk

EXAFAST NDS Monophase

- Single phase technique with one viscosity
- Easy to syringe with enough compression to attain accurate impressions

Product Code TOC137407
Includes 2x 48ml cartridges (96ml total)
6 mixing tips and instructions
List Price £29.50 pk

EXABITE II NDS Registration

- Bite registration material is easy to apply and will not slump or run
- Sets quickly in only 45 seconds and is easy to trim if necessary
- Ideal cream-like consistency allows patients to occlude without deviation or distortion

Product Code TOC890014
Includes 2x 48ml cartridges (96ml total)
12 mixing tips and instructions
List Price £39.95 pk

Outstanding accuracy

List Price £44.95 each

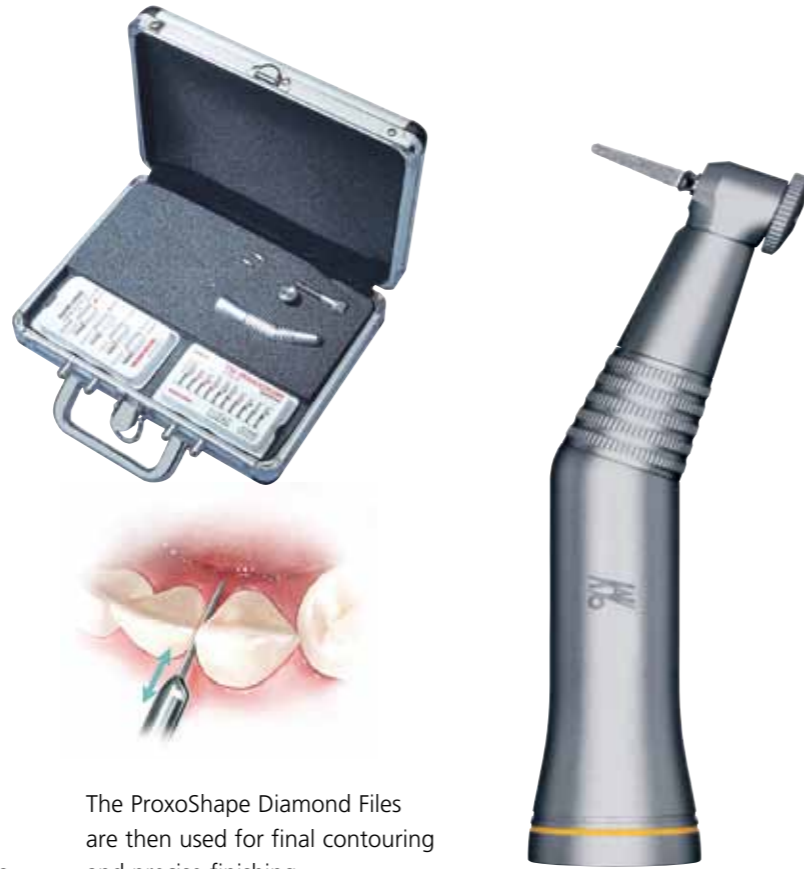

Intensiv Ortho-Strip System

The Intensiv Ortho-Strip System combines a Kavo handpiece with Intensiv Ortho-Strips to provide the safest and most precise option available for interproximal reduction. It offers outstanding reliability. The Intensiv Ortho-Strip kit is an irrigated system reducing friction and heat and thereby improving patient comfort. The kit includes a Kavo Contra Angle Handpiece with Head, and both double and single sided Ortho-Strips.

- Rapid and controlled reduction of enamel
- Safe and precise
- Outstanding reliability
- Fully autoclavable strips

Intensiv Ortho-Strip Kit
 Kit includes: Kavo Contra Angle Handpiece Head, Double Sided Ortho-Strips and Proxo Shape Single Sided Strips.
 Product Code.....KIT97-990-00
 Price£999.50 each

The reduction area may be approached from multiple angles as the handpiece head rotates 360 degrees and contouring is achieved using the flexible diamond strips.

The ProxoShape Diamond Files are then used for final contouring and precise finishing.

Intensiv Double Sided Ortho-Strips

- Flexible strips, diamond coated on both sides
- 5 different grades
- Available in sets or as single units
- Fully autoclavable strips

Individual Strips

 List Price £10.50 each

Incremental Thickness Gauge

Pack of six gauges for measuring interproximal spaces.

Product Code... 25-990-25
 List Price£58.50 set

Ideal Interproximal Reduction Kit

The Ideal Stripping Kit has a W&H handpiece combined with the Orthofile System for safe and efficient stripping. The ultra thin metal strip and plastic handle allow the strips to be flexible for easy contouring.

- Safe and efficient stripping
- Ultra thin and flexible diamond coated strips for easy contouring
- Colour coded for easy identification

SWISS MADE

Orthofiles

- 15µm White** Used for initial stripping in severely crowded cases and where you are finishing enamel, composites or ceramics.
- 25µm Yellow** Used for initial stripping in crowded cases and where you are aiming for a prepolished surface finish.
- 40µm Red** Used for reduction when crowding exists or where you would like to contour to a fairly smooth finish. Will reduce enamel, restorative materials and composites.
- 60µm Grey** Used for initial reduction when there is a degree of crowding or when there is existing space. Will reduce and contour enamel, restorative materials and composites.
- 90µm Green** Used for maximum reduction at the initiation of interproximal stripping and contouring. Will reduce restorative enamel, restorative materials and composites.
- 120µm Black** Used for maximum reduction at the initiation of the interproximal stripping.
- 150µm Blue** Used for initial reduction when a larger reduction is indicated.

Ideal Interproximal Reduction Kit
 Kit includes: W&H Handpiece, Orthofile system (7 single sided blades) and Measuring Gauges.

THE **FAST** TRACK TO STRAIGHT TEETH

WORKS WITH FIXED APPLIANCES AND ALIGNERS

Just 20 minutes of daily use enhances the orthodontic force applied by braces or aligners to safely accelerate the rate of tooth movement.

The new AcceleDent System is designed to deliver this therapy – in the form of gentle microvibrations to increase the rate of alveolar bone remodelling– in a way that is comfortable and easy to use.

The advantage is shortened orthodontic treatment time and all of the benefits associated with the fast track to straight teeth and a great smile.

AcceleDent is light, comfortable, hands-free, and can be used while multi-tasking or while engaged in a variety of daily activities. Patients have reported use while reading, watching television and even commuting.

The latest clinical data demonstrates an accelerated tooth movement both during initial alignment (106% faster) and space closure (38% faster) phases of orthodontic treatment. Also, use of AcceleDent does not increase the risk of either root resorption or TAD loosening. If you would like to receive a copy of this clinical trial please contact TOC on 0117 975 5533.

Patient Benefits

- Reduced treatment time without compromised aesthetics
- Less likely to develop caries or gum disease with shortened treatment
- Clinical trial demonstrates no increased root resorption
- Can help alleviate pain after a wire change

Clinical Benefits

- Reduced treatment time enables improved practice productivity
- Innovative technology provides practice differentiation
- 100% compatible with any biomechanical system

Phone 0117 975 5533

demonstration for you
and your practice team

“ When treating patients with aligners, my protocol is to change them every two weeks as recommended by the manufacturer. In the cases that I have been treating with AcceleDent, aligners have been changed every 10 days thereby speeding up treatment with no detrimental effects .

So far the feedback from patients has been very positive. ”

Dr Gerry Bellman

Hampstead & Quadrant Orthodontic Practices

“ I am really surprised at how well AcceleDent works. It is certainly a useful adjunct to my orthodontic techniques. Not only does it work with fixed appliances, it works equally well with aligner appliances. For those patients who are keen to reduce their treatment time I would definitely recommend it! ”

Dr Stewart Hawthorn

Winchester Orthodontic Practice

“ I have 43 patients using AcceleDent and 6 who have finished treatment. The prospect of safely speeding up treatment is attractive to many adults and some children whether using buccal/lingual fixed appliances or clear aligners. ”

Dr Sharon Orton Gibbs

Walpole Specialist Orthodontic Clinic
