## Bite-Bumper™ Opens deep bite without trauma

Bite-Bumpers work in open and deep bite cases by allowing the anteriors to ride up and out of occlusion without patient trauma.

Our Bite-Bumpers eliminate bond failures of brackets and are especially valuable with ceramic or self-ligating brackets.

The unique fixed "placement-jig" guarantees the correct height on the lingual of the tooth and makes sure the two Bite-Bumpers are 100 % parallel.
