

State-of-the-Art Performance

The truly unique formulation of the Encore! silver alloy lined archwire slot separates it from the competition. Patented silver alloy lined archwire slot allows it to out perform other "metal-reinforced" aesthetic brackets currently available. This special biocompatible formulation is nickel free, great for sensitive patients.

The Ultimate Aesthetic Alternative

Encore! brackets are formed with 99.9% pure polycrystalline alumina and are impervious to stains and discolouration. The small size, smooth surfaces and rounded corners are designed for the maximum in patient comfort as well as providing unsurpassed strength and breakage resistance.

Proven Clinical Performance

The Encore! ceramic bracket system has a unique state-of-the-art dovetail base design to achieve maximum bonding surface between bracket and adhesive. The base design results in an excellent adhesion due to the increased surface area. Encore! offers the pleasing aesthetics patients want, with the clinical functionality orthodontists need in a ceramic bracket system.
