

Eruption Appliances

Eruption Appliance 14k gold chain

After bonding the Caplin Hook to an impacted tooth, attach an elastic thread to the end of the gold chain. Movement of the tooth is measured by counting the links of the chain as they become exposed. The low profile and positioning of the Caplin Hook minimises irritation and the patented SuperMesh base ensures reliable bonding, particularly with Fuji Ortho LC which is recommended for use in a wet field. The U-FLEX™, with its curved base that you can adjust, offers yet another option for teeth that are impacted at various angles. Allergic reactions are minimised because the chain is 14k gold and the button is titanium nitride coated.

Eruption Appliance	17-000-10
Price	£27.50 each
Eruption Appliance, eyelet	17-001-10
Price	£24.95 each
U-FLEX	17-100-50
Price	£29.95 each

Eruption Appliance 24k Plated Gold Eyelet and Traction Chain

2 Base Styles to Choose From

- | | |
|-------------------------------|----------------------------|
| Rectangle Base Eyelet | Round Base Eyelet |
| • Low nickel MIM alloy | • Stainless steel |
| • One-piece integrated eyelet | • Eyelet brazed to base |
| • 3mm x 3.75mm curved base | • 3.5mm diameter flat base |
| • Micro-etched MIM mesh base | • 80 gauge foil mesh base |

Take Control of Impacted Cuspids

Bondable to cuspids impacted palatally or labially. The 1" traction chain swings freely within the eyelet. The small .016" diameter and large .022" diameter chain links can be cut easily. The chain can be tied to the archwire with elastic thread or tubing to provide traction in the desired direction.

Safe for Nickel Sensitive Patients

The potential for allergic reaction is minimised with a plating of 24 karat gold, which helps to limit the amount of nickel ions that can be released into the oral environment.
