

Stainless Steel Archwire

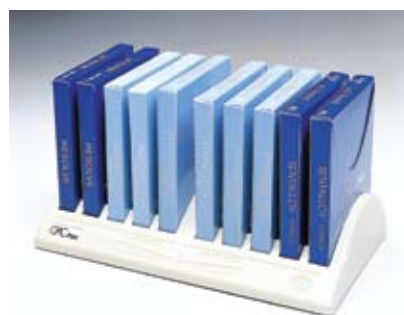

GAC's Stainless Steel archwire is manufactured to the highest standards in the industry, from only the best, most expensive type 304 VAR steel. It is virtually free from imperfections that can cause brittleness and breakage. Each lot is tested for consistency in rebound and deflection both before and after heat.

- 100% inspection for shape, flatness, finish and torque
- All archwires are individually wrapped
- A perfect balance of spring-back and formability
