

MiniStripper™

Safety and Control at Your Fingertips

- Small size provides control and stability in tight spaces
- Compact size is safer to use than other interproximal stripping devices
- Variety of strip sizes for every interproximal stripping need
- Easy to use – different strips can be changed in seconds
- Strips are available as single-sided or double-sided providing precise stripping of intra-arch space
- All kit components are autoclavable up to 275°F/135°C
- Stainless steel construction

See page 131 for Tooth Mousse to help restore lost minerals and protect from decay & decalcification

Designed by an Orthodontist
