An Independent Clinical Evaluation
 Concluded that Resilience Light-Cure
 Adhesive is...

*"Recommended due to minimal bond
 failures."*

"Very easy system to use."

Rated "Excellent" in its
 clinical evaluation.

Resilience Light-Activated Orthodontic Bonding Systems

Provides the optimum properties for bonding ceramic, metal, or plastic brackets using light-cure technology. The smooth, tacky composite resin delivers ideal handling characteristics which eliminate bracket flotation and allow for easy flash clean up. Light activation provides additional working time to ensure accurate bracket placement. Produces a strong light cured chemical bond which also debonds easily. Archwires can be placed immediately after fully curing the brackets. Fluoride releasing to help protect against potential decalcification.

Light-Activated Syringe Kit

Product Code: FC-RESI-006
 4x 3.5gm Syringes, 7mL Sealant Resin, 4gm Green Gel Etchant Syringe
