TOC IPR Bundle

Fast, safe and precise

**ACHIEVES 20 MINUTES OF MANUAL
IPR IN APPROX. 60 SECONDS**

Kit contains:

- Swingle Contra-angle with or without light
- Ortho Strips Tray with 2 openers 08µm, 3 Central Medium 40µm, 1 Central Polishing 15µm (IS-200-05)
- IPR Distance Control Gauge (TOCIPR-DC)

2 Year Warranty

PRODUCT	CODE
Kit with Electric Motor	IS-100-99
Kit with Electric Motor, with light	IS-100-98
Kit with Air Motor	IS-100-99A
Kit with Air Motor, with light	IS-100-98A

- Precise, calibrated reduction of enamel with a step by step protocol, ensuring maximum safety
- Easy, controlled opening of the contact points
- Contouring, finishing and final polishing
- Contra-angle handpiece with integrated water spray

**INCLUDES
FREE
CLEANING
BRUSH
& CASE**

TESTIMONIALS

“ I have been using the Swingle for 5 years and it has changed how I deliver IPR for both aligners and fixed appliances.

The Swingle offers control and contouring not possible with other motorised IPR instruments.

I would highly recommend this appliance for anyone carrying out IPR. ”

Dr. Farooq Ahmed
Consultant Orthodontist

“ The Swingle has made carrying out IPR much more efficiently in my clinical practice; the initial contact point opening strip is particularly helpful.

Being able to rotate the position of the handpiece and to bend the individual IPR strips to match the contour of a given tooth also make posterior IPR a lot more predictable.

I would definitely recommend it to clinicians wanting to perform IPR stress-free. ”

Dr. Tom Frawley
Consultant and Specialist Orthodontist

Opening of the
interdental space

Ortho-Strips System

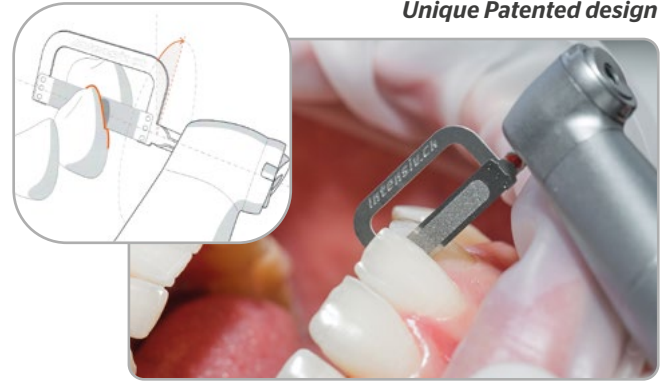

100% NATURAL
DIAMONDS

Unique Patented design

- Easier entry into the interdental contact points
- Conservation of the original morphology of the middle part of the tooth

- Prevention of cervical steps
- No unnecessary removal of dentine
- No dentine hypersensitivity

Central - Double Sided Strips

- Oscillating strips with diamond coating in the central area
- Simplified insertion into the interdental contact points in the central area
- Prevention of cervical steps
- Conservation of the original morphology of the tooth equator
- Prevention of dentine hypersensitivity
- Reusable, fully autoclavable strips

Intensiv ProxoStrip

Practical, fast, ergonomic

A unique, diamond-coated metal strip for final polishing of proximal surfaces. A metal strip with grip secure strip ends, diamond-coated on one side, with two working areas of different grit sizes.

- Sterilisable, reusable
- Finishing and polishing in one process
- Ergonomic grip for simple, safe use
- Short strip for improved finger support while stripping

PRODUCT	CODE
Pack 6	TOC-PX4015-6
Pack 12	TOC-PX4015-12

Intensiv Proxo Contour Strips

Unique, diamond-coated metal strip for contouring and finishing

Perforated with two grit sizes, 80 micron coarse and 40 micron fine, for efficient, manual space creation.

- Metal strip, diamond-coated on one side only with two working parts of different grit size
- Perforated anatomical ends for a better gripping
- Sterilizable and reusable
- Total length: 80 mm | Height: 2.5 mm

PRODUCT	CODE

Tungsten Carbide Debonding Burs

Quantum burs are designed, manufactured and finished for optimum strength, performance and durability offering efficient debonding and adhesive removal. They are brazed at the base of the neck as opposed to the base of the head as found in many competitor products. The stainless steel shanks allows for multiple autoclave cycles without the risk of corrosion and the convenient blister packaging keeps burs safe and well protected until needed.

BEST SELLER

PRECISION

Aligner Buttons®

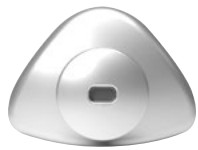

Try the first bondable buttons created for clear aligners

Orthodontists routinely use rubber bands with clear aligners to correct malocclusions. However, these elastics are being attached with components created for braces - not aligners. These auxiliaries too often debond or cause irritation because they have a small surface area and are intended for the centre of the clinical crown.

Here we have a new type of button that fits within the aligner cut out windows, like a puzzle piece. Whichever aligner system you use, this patented design gives you a reliable bond due to its large surface area and contour. Now you can reduce your unnecessary emergency patient visits with Precision Aligner Buttons.

Rhodium Coated Glass Mirrors

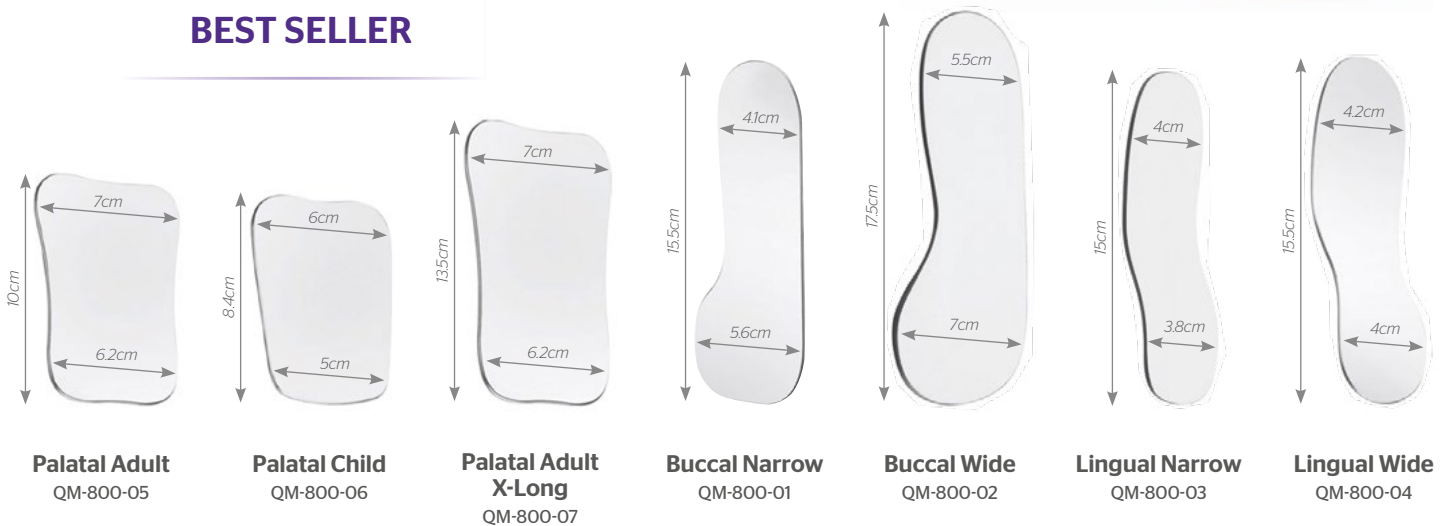

Superior reflectivity to chrome and metal mirrors

TruPix™ mirrors are coated with Rhodium, one of the earth's rarest elements and the world's most expensive precious metal. TruPix™ mirrors offer superior reflectivity compared to both stainless steel and chrome mirrors. Plus, they are double-sided for increased durability, have incredibly smooth edges for extra patient comfort and are fully autoclavable. TruPix™ makes a great choice!

TruPix™

BEST SELLER

Ultrabright Glass Mirrors

Simply the best!

These new generation dental mirrors feature a ground breaking ultrabright coating which for the first time achieves close to 100% reflectivity. The Ultrabright mirrors are single sided and come with a removable silicone handle for comfortable handling, which can be autoclaved together with the mirror.

Why Ultrabright mirrors?

- Reflectivity close to 100%
- More detail for intra-oral images
- True colour representation
- High durability for repetitive autoclaving (up to 390°F/198°C)
- Best product quality

Avanti™

INSTRUMENTS FOR ALIGNERS

The Art of Aligner Detailing

Now you can save valuable time and get great results from your aligner treatments. With these Avanti™ pliers it's easy to fine tune your aligners, saving both time and money.

TEAR DROP PLIER

SA-100-01

Creates a hook cut-out to hold elastics securely.

VERTICAL PLIER

SA-100-02

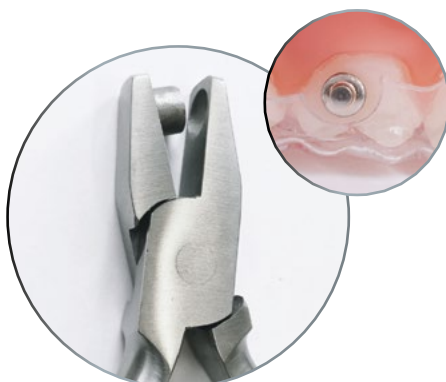

Creates a vertical indentation to help correct rotations.

HORIZONTAL PLIER

SA-100-03

Designed to create individual root torque by making a horizontal indentation.

HOLE PUNCH PLIER

SA-100-04

Creates a cut-out for bondable buttons and hooks to be placed directly on the tooth.

RETENTION PLIER

SA-100-05

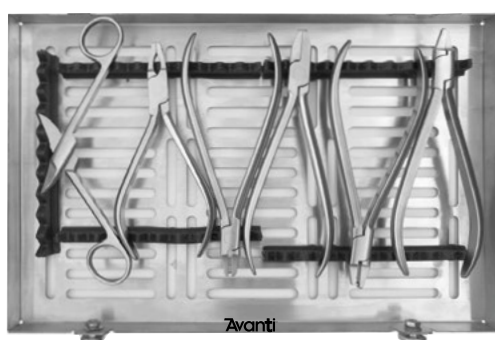

Creates a circular indentation for increased retention in both aligners and retainers.

Sterilisation cassette with all five Avanti™ pliers and small curved scissors.

COMPLETE AVANTI™ PLIER SET

SA-100-06

Presentation case containing all five instruments from the Avanti™ range.

ORTHO-FLEXTECH® Retainer Wire

ORTHO-FLEXTECH® provides secure and stable long term passive retention. The patented interlocking chain design forms naturally to the lingual curvature making it easy to fit in the chair. The chain lays flat against the teeth offering improved patient comfort and lasting aesthetics due to its 14K karat gold composition.

Available in three different material choices:

- White Gold (original)
- Nickel Free Gold
- Stainless Steel

An etched version is available for improved adhesion whilst the stainless steel option offers increased tensile and torsional strength.

Alliedstar IO Scanners

Fast and Easy!

The Alliedstar IO scanners are very easy to use, very fast, and also very affordable.

First time scanning by first time users is routinely less than 4 minutes for upper, lower, bite and refinement.

Alliedstar Sensa Wireless

- Wireless Charging

No cables or plugs, Sensa gets charged right away when put back in the holder and activated instantly when taken out

- 60-case Scanning per Charge

A full charge allows for a non-stop scanning of 60 cases, no recharge in between needed

- Compact and Ergonomic Design

Sensa's lightweight design enables effortless scanning, while the shockproof construction helps withstand accidental drops

- Undisturbed Transmission

Alliedstar's technology enables a steady transmission that covers a distance as long as 10 metres, undisturbed and seamless

“ Having trained over 4,000 dentists on every major intraoral scanner, I share that expertise through ongoing mentoring and support. AlliedStar is the fastest, most user-friendly scanner I've used, and our digital workflow days accelerate adoption while delivering clear ROI.

The Alliedstar scanners deliver what our customers ask us for - an easier life. As an example, Orthodontic clinics wish to convert their existing plaster models to digital files. The speed of capture, and the speed of saving the scan makes the AS scanners ideal for this purpose. Plus there are no extra fees!

Don't take my word for it, have a demo for yourself, at your Practice. ”

Orthodontic & Specialist Dental Supplies

ABOUT US

TOC (The Orthodontic Company) has been serving orthodontic professionals in the UK and Ireland for over 30 years, working globally to bring you the highest quality and innovative orthodontic products that help improve efficiencies in treatments.

We are proud to be appointed distributors for GC Orthodontics, Dentaureum, Reliance, Intensiv and Shock Doctor in addition to offering our own ranges of popular products. Our vast catalogue includes everything required for fixed appliance treatment including brackets, wires, TADs, instruments, IPR, and patient care as well as a full range of Aligner accessories to help ensure your aligner treatments are a success.
