

AUTUMN OFFERS & NEW PRODUCTS

www.tocdental.com
Offers end 30/11/23

The perfect bracket choice
for your private patients!

Now you can offer your patients a bracket with the durability of stainless steel and a 'white metal' appearance that blends beautifully with enamel.

Legend mini Rhodium is precision manufactured in Japan, with a CNC process providing the most accurate slot of any bracket available so the bracket values are precisely expressed. The anatomically correct mesh base makes them easy to place and ensures maximum retention on the tooth. Match with rhodium aesthetic wires for a completely discreet look.

Rhodium Aesthetic Archwires

Highly aesthetic wires featuring unrivalled properties that make them virtually invisible in the mouth.

Choose Initialloy superelastic thermal NiTi wires which exert the lightest force on the market and Bio-Active exerting progressive forces from the midline to the posterior region. Optimal force is adapted to the anatomy of the specific tooth to be moved.

These wires provide improved comfort for your patients and maximum treatment efficiency.

Initialloy - Round LIST PRICE: £61.95 (Pk 10)

Light Force - .014, .016, .018 Upper & Lower

Medium Force - .014, .016, .018 Upper & Lower

Bio-Active - Square/Rect. LIST PRICE: £103.75 (Pk 10)

Light Force - .020 x .020 Upper & Lower

Medium Force - .016 x .022, .019 x .025,

2. Controlled reduction, enamel contouring with the Intensiv Ortho-Strips System, Central, Medium 40µm.

3. Support for the control of the created space with the Intensiv IPR-Distance Control.

4. Polish of enamel with Intensiv Ortho-Strips System, Central, Polishing 15µm.

**BUNDLE KIT
OFFER PRICE**
£769 **SAVE £90!**
WORTH £859.20

IPR BUNDLE KIT OFFER

Intensiv Swingle, oscillating contra-angle

Intensiv Ortho-Strips Tray, with:
2 Opener, 08µm; 3 Central Medium, 40µm;
1 Central Polishing, 15µm

Intensiv IPR-Distance Control Gauge

- Precise, calibrated reduction of enamel with a step by step protocol, ensuring maximum safety
- Contouring, finishing and final polishing
- Rapid and controlled system – achieves 20 minutes of manual IPR in approx 60 seconds
- Contra-angle handpiece with integrated water spray

Double Sided Central Ortho-Strips

Our popular Ortho-Strips are now available with diamond coating on the central part of the strip only. These Central Strips allow the highest precision in the approximal reduction, finishing and polishing of enamel, respecting the original morphology and dental tissues.

They provide the safest form of IPR avoiding the creation of a step on entry due to the non-diamond coated lower edge of the strip and prevention of dentine abrasion.

List Price: £78.90 (Pk 3)

STRIPS (Pk 3)	DOUBLE-SIDED
08µm Orange, Opening	IS-008-03

D2™ Appliance

Simplifying Class II Correction

The D2 distalizing appliance was developed to simplify treatment of Class II cases during the initial stage of treatment. The patented D2 design treats to a Class I platform by the intra oral elastic forces. Molars are distally rotated into their desired position.

Take advantage of early treatment patient co-operation. Brackets can be placed during or after the Class I correction is completed.

Ghost™

INVISIBLY BRILLIANT

Sapphire aesthetics with polycrystalline strength and durability

With extraordinary aesthetics, Ghost provides precision and control with superior performance features that can only be achieved with highly sophisticated ceramic injection moulding technology. The result is a truly remarkable bracket system that takes aesthetics, performance and durability to unprecedented heights.

- Brilliant aesthetics without the glare of conventional sapphire brackets
- Excellent strength and fracture resistance
- Significantly less friction than other sapphire brackets providing shorter treatment times

LIST PRICE: £13.95 per bracket. Roth and MBT available.

Hi-Q™ Archwires

Manufactured to precise tolerances, Hi-Q offers all the features and benefits you would expect from a high performance wire.

NiTi and Thermal NiTi

- Super elasticity - very flexible and easy to engage
- Polished finish - low friction
- Superior shape memory - stays active right throughout treatment
- Low, constant force - for most efficient tooth movement and increased patient comfort
- Rigorous quality - every wire performs the same

Copper Nickel Titanium

The lighter forces and high flexibility of Hi-Q Copper NiTi allows for easier wire engagement in moderate to severely misaligned cases and reduces patient discomfort.

**Round/Rectangle may be mixed. Wire types may not be mixed.*

Treat your patients with

verve

PREMIER COLLECTION

- Guaranteed ease of use
- Treatment efficiency
- Predictable results

Verve has an advanced design that combines Metal Injection Moulding (MIM) and Computer Numerator Controlled Milling (CNC). MIM allows for a smaller and more detailed design which has greater strength whilst the CNC milling provides the most accurate of slots for advanced sliding mechanics.

esmail eruptor™

NEW

A novel method to aid eruption of partially erupted teeth within one visit. Partially erupted teeth can be bonded without the need for full eruption.

Designed by a British Orthodontist

- The Esmail Eruptor eyelet is offset from the bonding pad allowing the tooth to be bonded as soon as it erupts but still allows full activation of the NiTi wire.
- No need for constant repositioning of the bracket which only allows 1 - 2mm of eruption.
- 80-gauge mesh base.
- Ideal for canines and second premolars.

Single tube allows full activation in one visit.

Double tube allows sequential activation, perfect for those high canines which may need to be moved in stages.

PRODUCT	CODE	LIST PRICE
Single Tube (Pk 10)	JB-500-00	£29.95

PRODUCT	CODE	LIST PRICE
Double Tube (Pk 10)	JB-500-01	£29.95

Open space to allow impacted canine to erupt.

Esmail Eruptor is bonded and 0.014" wire ligated.

6 weeks later and the canine has fully erupted.

ABOUT THE INVENTOR

I very much enjoy efficient orthodontic treatment, no patient wants their braces to be on longer than they need to and I am always looking at ways to improve the efficiency of my treatment.

One clinical scenario I was getting really frustrated with was partially erupted teeth either canine teeth or second premolars, where only the tip of the enamel has just erupted. I have tried bending an offset and adding elastic chain to the eyelet or placing the wire above the bracket,

but all options were slow and time consuming.

The issue is the ideal position for bracket placement was still under the gingivae, I therefore decided to invent an offset eyelet to allow much greater activation of the NiTi wire to allow much quicker eruption. I hope you find this product as useful in your clinical practice as I have found it in mine.
