

# AUTUMN 2018 OFFERS

**New products!  
Great savings!**

Offers end 31/12/18

[www.tocdental.com](http://www.tocdental.com)

**NEW!**

Incorporating great new design features requested by you, the orthodontist!

The next generation self-ligating bracket from the company that set the standard in self-ligation performance

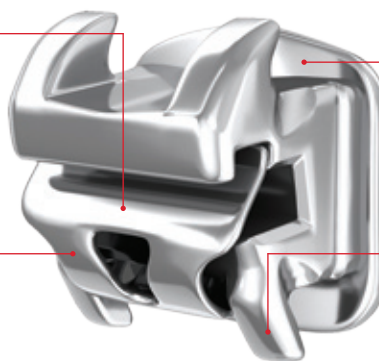

#### Opening Mechanism

Easy opening with **no dedicated instrument**, optimally placed to reduce risk of deformation

#### Reduced Curvature

**Improves clip strength** and increased wire retention forces

#### Enclosed Clip Channel

**Mitigates calculus accumulation** that can interfere with clip opening

#### Low Profile

**Reduced overall profile** up to 14.3% - with no reduction of interactivity - designed for improved patient comfort

# Ghost™

INVISIBLY BRILLIANT

## Sapphire aesthetics with polycrystalline strength and durability

Ghost is the very latest advancement in ceramic brackets, it offers the best aesthetics of any system available combined with superior strength and fracture resistance.

- Brilliant aesthetics without the glare of conventional sapphire brackets
- Excellent strength and fracture resistance
- Significantly less friction than other sapphire brackets providing shorter treatment times

Buy 10 full kits at the special price of **£6.95** per bracket and receive a Nespresso Coffee Machine **FREE!\*** Plus receive a framed poster and pack of patient leaflets **FREE!**

\*Worth £74.99  
Choose from red or white

List Price  
£12.95 per bracket

## Hi-Q Aesthetic Archwires

Tired of coated wires that chip and peel well before the next wire change?

Try our new unique aesthetic wires which offer the highest durability of any aesthetic archwire, free of any plating or coatings.

- Blends well with all aesthetic brackets and tooth shades
- Highly durable, lasting until the next wire change
- Resistant to staining
- Low friction, similar to non-aesthetic wires

## Crimp-It<sup>TM</sup>

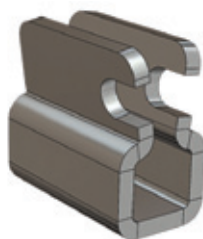

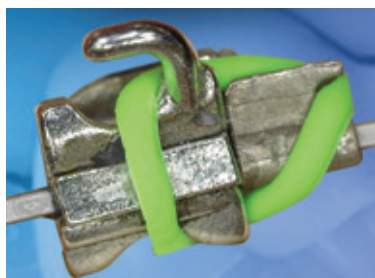

Diamond coated crimpable  
stop and tie back

A new crimpable stop that will not slide and can also be  
used as a tie back.

The slot feature in the Crimp-It is faster and easier to use than creating  
a tie back loop in the archwire or soldering a tie back hook to the arch  
wire. The proprietary diamond coating provides exceptional holding force;  
more than double that of uncoated crimpable stops.

The Crimp-It is easy to place without any special instrument and crimps  
without damaging or notching the archwire with no need to over-crimp due  
to the diamond coating.

For wire sizes  
.012" up to  
.012" x .025".

**NEW!**

# TN10™ BRACKET POSITIONER

## For precise bracket placement

The new TN10 has been designed by Dr Russell Samuels to position all brackets with a .018" or .022" slot. The instrument has a 'hockey stick' design on one end and a probe on the other.

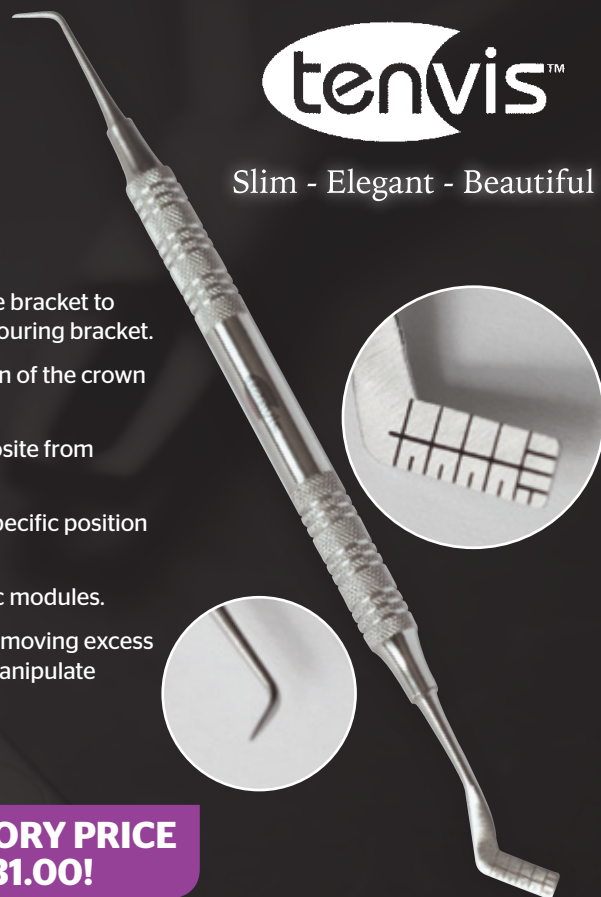

Slim - Elegant - Beautiful

### 10 Great Uses For The TN10!

- 1 The millimetre measurements on the toe and lower edge of the hockey stick enable it to be used as an intra-oral ruler to measure a variety of dimensions associated with the crown of the tooth and bracket, as well as measuring many other things in the mouth.
- 2 The toe and lower edge can be used to position the bracket without binding in the bracket slot when it is withdrawn, unlike probes and flat plastics which are all tapered and blind.
- 3 The long axis of the hockey stick end can be used to visualise the long axis of the crown and relate it to the bracket position on the crown.
- 4 Align the bracket in the relation to the tooth and bracket next to it.
- 5 Adjust the height of the bracket to coincide with a neighbouring bracket.
- 6 Measure any dimension of the crown and bracket.
- 7 Remove excess composite from around the bracket.
- 8 Place composite in a specific position on the fixed appliance.
- 9 Remove bracket elastic modules.
- 10 Probe any structure, removing excess cement or adhesive, manipulate power chain.
