

esmail eruptor™

A novel method to aid eruption of partially erupted teeth within one visit. Partially erupted teeth can be bonded without the need for full eruption.

NEW

Fully erupted teeth in just one visit!

- The Esmail Eruptor eyelet is offset from the bonding pad allowing the tooth to be bonded as soon as it erupts but still allows full activation of the NiTi wire.
- No need for repeated repositioning of the bracket.
- No need for complicated wire bends.
- 80-gauge mesh base.
- Ideal for canines and second premolars.

Single tube allows full activation in one visit.

Double tube allows sequential activation, perfect for those high canines which may need to be moved in stages.

Designed by British Orthodontist Zaid Esmail

*BDS (Hons.) MFDS RCS Ed. MSc.

PRODUCT	CODE	LIST PRICE
Single Tube (Pk 10)	JB-500-00	£31.50
Double Tube (Pk 10)	JB-500-01	£31.50

Open space to allow impacted canine to erupt.

Esmail Eruptor is bonded and 0.014" wire ligated.

6 weeks later and the canine has fully erupted.
