Value Instruments

Essentials instruments are made of surgical grade stainless steel which is highly resistant to corrosion. The precise tip alignment and diamond-honed edges ensures reliable cutting and holding of wires. Balanced joint assembly and well finished handles means Essentials instruments are easy and comfortable to use.

All Essentials instruments have an attractive satin finish so glare is reduced and the instruments have a pleasing quality look with no possibility of chrome plating peeling off. The cutters feature immunity steel tips for maximum performance. For safe use, cutting instruments are engraved with the maximum wire size to be used.

Cutters

Distal End Cutter

Safety hold cutters with immunity steel tips that will not discolour or rust. Cuts wires from .012" to .021" x .025" hard wires.

Code

TOC-E0319

Pin and Ligature Cutter

A standard pin cutter with tips that have an ideal length of 12mm. Cuts .012" to .016".

Code

TOC-E0330

Hard Wire Cutter

Specially designed for cutting hard wires. Cuts .022" x .028" and .022" hard wire.

Code

TOC-E0353

Adhesive Remover

Tip design allows access to remove adhesive in practically any area of the mouth. Replaceable teflon pad withstands high heat sterilisation.

Code

TOC-E0427

Straight Bracket Remover

Sharp tips wedge between the edge of the bracket base and tooth surface lifting off the bracket with no discomfort to the patient. The removers grip firmly for easy horizontal or vertical use.

Code

TOC-E0381

Short Band Remover

The padded tip rests on the occlusal surface whilst the pointed tip catches the edge of the band for upward or downward removal. High heat replaceable pads available in 4, 5 and 6mm diameter.

Code

TOC-E0373

Angled Bracket Remover

Same as TOC-E0381 above, but angled for easy access to difficult posterior areas.

Code

TOC-E0380

Long Band Remover

Same as TOC-E0373 above, but with a longer remover tip.

Code

TOC-E0371

CUTTERS AS LOW AS **£67.95** EACH

Ceramic Bracket Remover

Ideal to remove ceramic brackets with its sharp edges and 45 degree angles.

Code

TOC-E0437

Mauns Heavy Duty Cutters

The compound hinge gives you easy cutting with minimum force. Precise alignment tips for accurate cuts. Has a spring action for extra comfort and ease of use.

Code

TOC-E0357

Pliers

Weingart Plier

General utility plier with serrated tips to hold archwires firmly in the mouth. Angled for ease of working and good access.

Code

TOC-E0377

Slim Weingart Plier

General utility plier with slimmer tips for easier access to difficult areas. Serrated tips hold archwires firmly in the mouth.

Code

TOC-E0375

Bird Beak Plier

Facilitates bending round wire up to .030". Features hardened tips.

Item	Code
Standard	TOC-E0390
Slim	TOC-E0388

Light Wire Plier

With tapered beaks for forming precise bends and loops in round archwires up to .020".

Item	Code
Standard	TOC-E0392
w/Cutter	TOC-E0391
w/Grooves	TOC-E0631

Crimping Plier

Designed to crimp stops, hooks and posts to the archwire. The slot fits over the base of the hook while holding it tight for crimping.

Code

TOC-E0901

Three Jaw Plier

For adjusting clasps, retainers and archwires. With perfectly aligned tips which are tapered for delicate bending. Bends wire up to .030"

Item	Code
Standard	TOC-E0385
Rounded	TOC-E00305

Pliers

Band Slitter Plier

This instrument cuts upper and lower bands. It features a diamond shaped groove to safely trap band during removal.

Code

TOC-E0906

Tweed Loop Forming

Loop Forming Pliers with .040", .075" and .10" for making helical and bull loops.

Max. wire size .022" x .025"

Code

TOC-E0422

Cinch Back Plier

Cinches and bends NiTi archwires distal to buccal tube. Slim beak for precise working.

Code

TOC-E0802

How Utility Plier

Features straight serrated tips for a firm grip.

Tips are 3mm diameter.

Code

TOC-E0432

Nance Pliers

For precise forming of loops in four lengths (3,4,5 and 6mm). Rounded edges prevents wire damage.

Max wire size 0.028" wire.

Code

TOC-E0382

Optical Pliers with T.C. tips

Finely finished round and concave beaks for forming helical closing loops and arch adjustments. Can be used for loop tip backs and gable ends. Allows firm grip without nicking the wire.

Code

TOC-E0911

Tweed Loop Forming Plier (Omega)

The concave beak is contoured for making uniform Omega loops easily. The round beak has three sections of .045", .060" and .075" diameter. The round beak can be quickly replaced in the surgery. Max. .022" x .025" wire.

Code

TOC-E0424

V-Bend Pliers

Special design to make 1mm V Bends with one squeeze to shorten archwires or make a positive stop. Excellent for placing stops in nickel titanium wires.

Max. .019" x .025" wire.

Code

TOC-E0910

Arch Forming Pliers

The smooth inner surfaces of the convex and concave beaks allows forming and contouring of archwires.

Code

TOC-E0408

Tweed Arch Forming

Designed for double back or triple back wire bending and can accommodate .030", .036" square wires. Also ideal for torquing.

Code

TOC-E0412

Young Loop Forming Pliers

Universal plier for that can be used for many bending procedures. It provides a uniform dimension to loops. Max. wire size .028"

Code

TOC-E0425

Step Forming Plier

Make right or left, step up or step down bends in one simple action. Can be used intra-orally so no need to remove the archwire. 3 sizes allow the precise amount of bend required. Also able to intrude or extrude a tooth and change inclination or rotation.

Size	Code
0.5 mm	TOC-E0712
0.75 mm	TOC-E0711
1 mm	TOC-E0710

Adams 64 - Utility Plier

For adjusting orthodontic appliances.

Code

TOC-E0064

Adams 65

Square and rounded tips for forming springs and curves in wires.

Code

TOC-E0065

Rose Torquing Pliers

A set of 2 pliers designed to place torque in a specific section of archwire (single tooth) without distorting the rest of the wire and are suitable for labial or lingual use.

Code

TOC-E0902
