

Did You Know?

It's likely you've already heard about many of the well-known personalities who have had their teeth straightened by braces that are affixed to the back of their teeth. But did you know that your orthodontist can offer you MTM No•Trace orthodontic treatment for a fraction of the cost of many full mouth traditional wire braces?

*Ask your orthodontist if
MTM No•Trace is right for you.*

Lingual Minor Tooth Movement

An Embraceable You

When it comes to your orthodontic treatment, comfort means more than just a good fit. It means your treatment must also fit your life. MTM No•Trace is ideal for public and professional figures, people who are athletic or anyone who wants a discrete treatment option. MTM No•Trace braces can usually be applied in less than an hour, and treatment typically concludes in just 12 to 24 weeks. Get the out-of-sight, out-of-mind experience of MTM No•Trace and get the smile you've always wanted.

MTM no•trace™ Works Behind the Scenes

You want your smile to get noticed, not your braces! MTM No•Trace is the virtually undetectable orthodontic treatment to comfortably correct your smile in as little as 12-24 weeks. MTM No•Trace uses extremely small low-profile brackets that rest on the back side of the teeth to achieve minor tooth movement.

MTM No•Trace gently guides your teeth into their ideal position with little disruption to your everyday life. No•Trace is the discrete treatment you've been waiting for, so don't wait another day to get the smile you've always wanted.

"Fast, affordable and virtually undetectable treatment — now that's worth smiling about!"

Benefits You Can See. Treatment You Can't.

A more beautiful smile is just one of the many benefits of using MTM No•Trace. Improved tooth alignment means easier access to the tooth surface and gums during daily cleanings, reducing the chance of unwanted plaque buildup, tooth decay, and the chance for periodontal (gum) disease. And recent studies from the American Dental Association suggest that a healthy mouth can also help you maintain better overall health.

Am I A Good Fit?

MTM No•Trace addresses these common misalignments:

Spacing

Too much space between teeth

Crowding

Not enough space between teeth

Midline Correction

Teeth off center

Tipping

Teeth tip outward or inward

Rotation

Teeth are turned

Intrusion/ Extrusion

Teeth sit too high or too low
