## In-Ovation<sup>®</sup>X

The next generation self-ligating bracket from the company that set the standard in self-ligation performance

**BUY 5 KITS GET 2 KITS FREE**

### 3 Great Benefits!

#### REDUCED CALCULUS BUILD UP

- New enclosed clip channel helps to mitigate calculus build up that can interfere with clip opening.

#### EASY OPENING

- New opening mechanism with no special instrument, optimally placed to reduce risk of the clip deforming.

#### IMPROVED PATIENT COMFORT

- Reduced overall profile with no trade off in performance.

If you experience problems with calculus build up with your existing self-ligating brackets then give In-Ovation X a try!

# Crimp-it™

Diamond coated crimpable stop and tie back

A new crimpable stop that will not slide and can also be used as a tie back.

The slot feature in the Crimp-it is faster and easier to use than creating a tie back loop in the archwire or soldering a tie back hook to the arch wire. The proprietary diamond coating provides exceptional holding force; more than double that of uncoated crimpable stops.

The Crimp-it is easy to place without any special instrument and crimps without damaging or notching the archwire with no need to over-crimp due to the diamond coating.

tenvis™

# TN10 Bracket Positioner

For precise bracket placement

Designed by UK orthodontist Dr. Russell Samuels the new TN10 is a really useful instrument! The instrument has a hockey stick design on one end with millimetre measurements and a probe on the other.

## 10 Great Uses!

- Use as an intra-oral ruler
- Position the bracket by placing the lower edge in the bracket slot
- Use the long axis of the hockey stick end to visualise the long axis of the crown
- Align the bracket in relation to the tooth and bracket next to it
- Adjust the height of the bracket according to the neighbouring bracket
- Measure any dimension of the crown and bracket
- Remove excess adhesive from around the bracket
- Place composite in a specific position on the fixed appliance
- Remove elastic modules, manipulate power chain
- Probe any structure

# Hi-Q Aesthetic Archwires

Tired of coated wires that chip and peel off before the next wire change?

Not a coating, not a plating, our unique new matt wire treatment diffuses light so the wire blends in with the teeth and brackets, and seems to disappear in the mouth.

This special treatment means there's no coating or plating to peel off as with old style wires - this is the aesthetic wire you've been waiting for!

- Blends well with all aesthetic brackets and tooth shades
- Highly durable, lasting more than 12 weeks
- Resistant to staining
- Low friction, similar to non-aesthetic wires
