NiTi and Thermal NiTi Archwires

Consistent high quality guaranteed

Manufactured to precise tolerances, Hi-Q offers all the features and benefits you would expect from a high performance wire.

- Super elasticity - very flexible and easy to engage
- Polished finish - low friction
- Superior shape memory - stays active right throughout treatment
- Low, constant force - for most efficient tooth movement and increased patient comfort
- Rigorous quality - every wire performs the same

List Price per Pk10

Nickel Titanium

Round - **£11.35** / Rectangular - **£15.15**

Thermal Nickel Titanium

Round - **£15.15** / Rectangular - **£19.29**

Round and rectangle may be mixed. NiTi/Thermal may not be mixed.

Copper Nickel Titanium

The lighter forces and high flexibility of Hi-Q Copper NiTi allows for easier wire engagement in moderate to severely misaligned cases and reduces patient discomfort.

- Consistent performance
- Easy engagement
- Euro, Full and Universal archforms
- Universal, with or without stops

List Price per Pk10

Euro/Full/Universal

Round - **£26.75** / Rectangular - **£31.99**

Universal, with stops

Round - **£28.95** / Rectangular - **£33.75**

VERVE

PREMIER COLLECTION

Verve has an advanced design that combines Metal Injection Moulding (MIM) and Computer Numerator Controlled Milling (CNC). MIM allows for a smaller and more detailed design which has greater strength whilst the CNC milling provides the most accurate of slots for advanced sliding mechanics.

- CNC milled slot for greater precision and more efficient treatment
- Offset and extended base options to suit your specific requirements
- Compound contouring facilitates placement
- Low profile minimises occlusal interferences
- Palladium alloy brazing for the strongest bracket-to-base bond
- Mushroom shaped hook secures chains and ligatures in place without slipping
- Torque in base for level slot alignment

All kits come pre-loaded ready for bonding at no extra cost

Crimp-It™

Diamond coated crimpable stop and tie back

WILL NOT SLIDE!

- The diamond coating provides exceptional holding force - more than double that of uncoated crimpable stops
- Easy to place without any special instrument
- Crimps without damaging or notching the archwire with no need to over-crimp due to diamond coating
- The slot feature in the Crimp-It is faster and easier to use than creating a tie back loop in the archwire or soldering a tie back hook to the arch wire.
- For wire sizes .012" up to .012" x .025"

Premium Aesthetic Archwires

The unique matt wire treatment diffuses light so the wire blends well with the teeth and brackets, and seems to disappear in the mouth. Unlike traditional coated wires there is no coating or plating to chip or peel off.

- Blends well with all aesthetic brackets and tooth shades
- Highly durable, lasting until the next wire change
- Resistant to staining
- Low friction, similar to non-aesthetic wires
