Ghost™

INVISIBLY BRILLIANT

Sapphire aesthetics with polycrystalline strength and durability

With extraordinary aesthetics, Ghost provides precision and control with superior performance features that can only be achieved with highly sophisticated ceramic injection moulding technology. The result is a truly remarkable bracket system that takes aesthetics, performance and durability to unprecedented heights.

- Brilliant aesthetics without the glare of conventional sapphire brackets
- Excellent strength and fracture resistance
- Significantly less friction than other sapphire brackets providing shorter treatment times

Indulge yourself with velvety smooth hot chocolate & coffee!

"Having tried multiple aesthetic brackets, I now only use Ghost for patients who want a discrete appliance. They fit perfectly into our practice and our patients love them. They hold their colour, are easy to handle, and crucially, are easy to remove. The tie wings don't break and they are beautifully low profile."

Libby Graham

Specialist Orthodontist, The Straight Tooth Company

TOC
discover the difference

INTRODUCING

Central Ortho-Strips

Our popular Ortho-Strips are now available with diamond coating on the central part of the strip only. These Central Strips allow the highest precision in the approximal reduction, finishing and polishing of enamel, respecting the original morphology and dental tissues.

They provide the safest form of IPR avoiding the creation of a step on entry due to the non-diamond coated lower edge of the strip and prevention of dentine abrasion.

- Easier entry into the interdental contact points
- Conservation of the original morphology of the middle part of the tooth

- Prevention of cervical steps
- No unnecessary removal of dentine
- No dentine hypersensitivity
